DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-19 drawn to information processing using sensing device classified in class 382, subclass 313.

Invention II: Claims 20-35, drawn to a system for providing information in client/server environment, classified in class 709, subclass 203 and class 382, subclass 305.

2. The inventions of Groups I and II are distinct from the each other because of the following reasons:

Inventions I (Claims 1-11 and 30-34) and II (Claims 12-29) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the Invention II requires a publication server for providing information to client while Invention I does not require such publication server.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duy M Dang whose telephone number is 703-305-1464. The examiner can normally be reached on Monday to Thursday from 6:30AM to 5:00PM..
